SUMMARY

Motivated Software Engineering student at Capital University of Science and Technology, currently in my 6th semester with a CGPA of 3.73. Proficient in Python, C/C++, and Java with a strong foundation in software engineering principles. Seeking an internship opportunity to apply my technical skills, gain hands-on industry experience, and support the development of my Final Year Project.

EDUCATION

Capital University of Science and Technology, Islamabad, Pakistan

Sep 2023 – Present

B.S. in Software Engineering — 6th Semester | CGPA: 3.73

- Awards: Dean's Honor (All Semesters)
- Relevant Coursework: Data Structures, Algorithms, Operating Systems, Database Systems, Software Engineering

SKILLS & TECHNOLOGIES

Languages: Python, JavaScript, TypeScript, Java, C++, SQL

Frameworks & Libraries: React, Node.js, Express, Spring Boot, Plotly, NumPy

Cloud & DevOps: Docker, CI/CD, Git, GitHub Actions

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Tools: Jira, Clickup, VS Code, VS, Postman, Figma, PyCharm

PROJECTS

Project 1: Garage Management System

March 2026

Next.js 14, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Vercel

- Built a multi-role full-stack web app with 9 user roles, role-based access control, and real-time job tracking.
- Automated invoicing with tax calculations and inventory management, reducing manual paperwork by 90%
- Wrote 225+ test cases achieving 95%+ coverage with zero critical bugs at deployment

Project 2: Student Mental Health & Stress Tracker

April 2026

Java Spring Boot, MySQL, Thymeleaf, Tailwind CSS, Chart.js

- Developed a full-stack app for students to track mood and stress with visual trend graphs and a 90-day heatmap.
- Implemented role-based access (Student, Counselor, Admin) with auto alerts for at-risk students
- Integrated real-time chat, PDF reports, voice journaling, and gamification features

Project 3: AI Course Scheduling System

Feb 2026

Python, Genetic Algorithm, Streamlit, Plotly

- Built an AI timetable optimizer using Memetic Genetic Algorithm generating 100% clash-free schedules in under 15 seconds
- Scheduled 8 semesters across multiple departments with zero room conflicts using a shared master timetable
- Delivered an interactive dashboard with real-time analytics, filtering, and CSV export

ACTIVITIES & VOLUNTEERING

CUST Hackathon 2025 | Capital University of Science & Technology

May 2025

- Competed among university-wide participants, finishing in the top 30%
- Built an AI-based Plant Disease Detection System as part of a team under time-constrained conditions

Volunteer: Islamabad Traffic Police | Academic Activity | 4 Weeks

January 2026

- Joined as part of an academic community service, gaining firsthand exposure to government sector operations
- Assisted in road repair awareness drives and public awareness campaigns to promote traffic safety and civic responsibility
